

Profile

Frontend and Fullstack Developer with **3+ years** of commercial experience building scalable and high-performance web applications. Strong expertise in **React, TypeScript and Next.js**, with hands-on experience in **fintech, AI and crypto products**. Experienced in designing frontend architecture, integrating payment systems, working with real-time data and building fullstack solutions using **Node.js** and Python. Passionate about performance, scalability and product-focused development.

Professional Experience

CryptoStoryBank, Remote
Frontend Engineer

Feb 2025 to Present

- Developed core frontend functionality for a crypto banking platform using React, TypeScript and Redux
- Built secure and scalable user interfaces for banking operations, including transactions, wallet management and KYC workflows
- Implemented real-time data updates and financial dashboards with a focus on performance and UX
- Designed and developed an internal admin panel for managing users, compliance processes and financial operations
- Integrated crypto wallets and payment infrastructure, improving transaction reliability and user experience
- Collaborated closely with backend, product and security teams in an agile environment
- Improved application performance and reduced UI latency through code optimization and caching strategies

Fora Soft, Saint Petersburg
Fullstack Developer

Sept 2024 to Feb 2025

- Worked on custom web development projects for international clients as a fullstack engineer
- Built end-to-end features using React, Node.js and REST APIs
- Integrated Stripe payment systems including subscriptions, one-time payments and webhook handling
- Developed backend services and optimized API performance and scalability
- Participated in architectural discussions and contributed to reusable components and modular codebase
- Delivered features in fast-paced environments with tight deadlines

Pavepo, Remote
Frontend Developer

Sept 2023 to Aug 2024

- Led development of key product interfaces using React, TypeScript and modern frontend architecture
- Improved performance and responsiveness, increasing user interaction speed by 30%
- Designed scalable and reusable UI components and design system foundations
- Built Telegram Mini Apps and integrated payment systems
- Implemented caching, lazy loading and performance optimization strategies
- Conducted code reviews and mentored junior developers
- Collaborated with cross-functional teams to deliver production-ready features

Picturino AI, Remote
Fullstack Developer

Sept 2022 to Aug 2023

- Developed a high-performance image editor with complex state and rendering logic
- Integrated AWS S3 for large-scale image processing
- Implemented AI and LLM features including streaming responses and token processing
- Built backend services with Python and ML pipelines
- Designed scalable API layers for AI integrations

Education

Innopolis University

Aug 2022 to Sept 2026

Bachelor's Degree in Cybersecurity, Innopolis

- Built a strong foundation in computer science, software engineering and fullstack web development, including system design and scalable architecture.
- Completed academic and team projects focused on backend integration, databases and modern development practices.

Yandex

Jun 2025 to Sept 2025

Yandex School of Interface Development, Remote

- Developed strong expertise in React and TypeScript, including scalable component architecture, performance optimization and modern frontend best practices.
- Gained hands-on experience with internationalization (i18n), accessibility (a11y), testing and modern build tools such as Vite and Webpack.
- Worked in a cross-functional team on a real-world product, collaborating with backend engineers, designers and QA, following production workflows including code reviews, documentation and agile development.
